

第 32回サイトプロテクション研究会 プログラム

The 32nd Annual Meeting of the Japanese Society for Cytoprotection & Cytobiology

Date: March 23rd, 2014 Venue: Room C1, Kyoto International Conference Center(ICCK)

10:25-11:30	Opening Address			
10:30-11:25	General Session 1			
10:30-10:45	1	ρ 0 cells are Susceptible to X-irradiation	Hiroko P. Indo	Kagoshima University
10:45-11:00	2	The deficiency of histidine enhances the delay of wound healing caused by indomethacin through the mitochondrial dysfunction	Hiroshi Ichikawa	Doshisha University
11:00-11:15	3	Redox Properties of a Water-Soluble Cyclic Selenide and Its Application as a Glutathione Peroxidase Mimic	Michio Iwaoka	Tokai University
11:15-12:00	General Session 2			
11:15-11:30	4	Morphological and molecular components of tolerance to complete desiccation in the cells of an anhydrobiotic insect	Oleg Gusev	University of Kazan
11:30-11:45	5	Gastric Cancer Chemoprevention by Phenethyl Isothiocyanate-Containing Diet in Chemically - but not Genetically - induced Gastric	Anders Øverby	Norwegian University of Science and Technology
11:45-12:00	6	Oligosaccharides from agar ameliorate intestinal inflammation through the induction of heme oxygenase-1 expression in macrophages	Yasuki Higashimura	Kyoto Prefectural University of Medicine
12:00-13:00	Luncheon Seminar			
12:00-13:00	L	Molecular Mechanism in the Pathogenesis of the Colitis-Associated Colorectal Cancer	Kiichiro Tsuchiya	Graduate School Tokyo Medical and Dental University
13:00-14:10	Special Lectures			
13:00-13:35	SL1	Pathomechanisms of Parkinson's disease: insights from the monogenic forms	Nobutaka Hattori	Juntendo University
13:35-14:10	SL2	Mitochondria are a Novel Target for Prevention of the Side Effects of Cancer Therapy	Daret K. St Clair	Kentucky University
14:10-14:30	Coffee Break			
14:30-15:30	General Session 3			
14:30-14:45	7	Carbon monoxide-releasing molecule attenuates intestinal ischemia-reperfusion injury in mice via up-regulation of Nrf2/HO-1	Kazuhiro Katada	Kyoto Prefectural University of Medicine
14:45-15:00	8	Rosuvastatin Prevents Liver Tumorigenesis in High-fat Diet-fed Mice	Shinya Fukunishi	Osaka Medical College
15:00-15:15	9	Role of Substance P and CGRP in Gastric and Hepatic MALT Lymphoma induced by Helicobacter heilmannii Infection	Masahiko Nakamura	Kitasato University

第 32回サイトプロテクション研究会 プログラム

15:15-15:30	10	Reduction of Prostaglandin Transporter Is an Independent Predictor of Poor Prognosis in Gastric Adenocarcinoma Associated With Tumor	Shogo Takeda	Osaka City University
15:30-15:45	Closing Ceremony
